

AVADHOOT VIRKAR

Data Analyst | BI Analyst | Data Analytics

Thane, Maharashtra, India | 8975348391 | avadhootvirkarr@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Data Science graduate with hands-on experience in Python-based data cleaning, exploratory analysis, SQL querying, database-backed applications, and interactive dashboards. Skilled with Pandas, NumPy, Excel, Power BI, Matplotlib, MySQL, MongoDB, and REST APIs through academic projects and a structured data analytics virtual internship. Built analytical applications for AQI monitoring, movie recommendations, and insurance workflows. Seeking entry-level Data Analyst, BI Analyst, or Business Analyst opportunities.

EDUCATION

A. P. Shah Institute of Technology, Thane

2022 – 2026

B.E., Computer Science & Engineering (Data Science) • CGPA: 8.04 / 10

- Relevant Coursework: Data Structures & Algorithms, Machine Learning, AI, Cloud Computing, Computer Networks, Data Analysis & Cleaning

TECHNICAL SKILLS

- Languages:** Python, SQL, Java
- Data Analysis:** Pandas, NumPy, Matplotlib, Microsoft Excel, Power BI
- Visualization & BI:** Power BI, Excel Pivot Tables, Pivot Charts, Matplotlib
- Databases:** MySQL, MongoDB, Firebase
- APIs & Backend:** Flask, REST APIs, OpenWeather API, Brevo API, OpenAI API
- Machine Learning:** Scikit-learn, Recommendation Systems, Applied ML fundamentals
- Tools & Formats:** Git, GitHub, n8n, CSV, Excel, JSON

PROJECTS

Insuresafe — Automated Insurance Claim & Policy Management System

Python, Flask, MongoDB, JavaScript

- Developed an end-to-end insurance application supporting 5 policy categories, recommendations, purchases, claim submission, identity verification, and admin review.
- Implemented policy recommendation and affordability logic using age, income, existing policies, and budget constraints to identify suitable plans and prevent over-budget purchases.
- Designed MongoDB data structures and integrated Flask with the database to manage users, policies, claims, and verified claims.
- Tested workflows across 150+ claim, user, and Aadhaar images; combined automated checks with manual admin review for mismatches.

Movie Recommendation System

Content-based recommendation · Python, Pandas, NumPy, Scikit-learn, Streamlit

- Cleaned and combined two movie datasets (~4,800–5,000 records), handling missing values, duplicate records, and unnecessary text.
- Built a content-based recommendation system using genre and keyword similarity to recommend 5 similar movies for a selected title.
- Developed an interactive Streamlit interface displaying descriptions, genres, cast, release info, keywords, and recommendations.

AQI Tracker

AQI analysis & visualization · Python, Flask, Pandas, Matplotlib, OpenWeather API

- Developed the AQI analysis module, processing PM2.5/PM10 pollutant measurements to determine AQI levels and provide precautionary guidance.
- Created bar charts, line graphs, and scatter plots to visualize pollutant levels and identify increasing/decreasing AQI trends.
- Integrated OpenWeather API data with Python/Flask, resolving API-key issues during development and testing.

LEADERSHIP EXPERIENCE

Head of Event Organization — Exhault Cultural Fest

- Led a team of 4–5 members while coordinating 5 activities with the senior committee and faculty.
- Managed participant flow and registration for approximately 30–35 teams of 5 members each.

INTERNSHIP EXPERIENCE

AICTE–EduSkills Virtual Internship — Data Analytics with Python & Power BI

Jan 2026 – Mar 2026

- Gained practical exposure to Python data exploration, SQL querying, data cleaning, and interactive Power BI dashboards through a structured 10-week program using course-provided datasets.

ACHIEVEMENTS & CERTIFICATIONS

- Runner-up — DataWeb Hackathon: built an AI-automated dashboard to generate insights from organizational datasets.
- Career Essentials in Data Analysis — Microsoft & LinkedIn Learning, 2026
- AI Fundamentals: Foundations for Understanding AI — IBM SkillsBuild, 2026
- AWS Academy Graduate — Cloud Foundations, 2025
- Filed a Government of India Copyright Office application for the original computer software Insuresafe (February 2026).
